i agree that it may be too late, but go ahead and call her since st. pete is getting ready to start its program, maybe they would want to talk about one having been finished--gnc

Mayor – would you like me to follow up with Melissa Seixas regarding press follow-up for the completion the LED installation? The install was completed on 8/15/2016. May be a little too late but up to you.

Paul – one more question – do you know when (est month) the install was complete? If it has been too long, I'm not sure the Mayor would want to do a press release.

Thank you for your help.

Don't know anything about a press follow up. The LED conversion was complete for all the roadways except downtown Cleveland where the decorative lights could not be changed to LED. They are going to be done this year by changing out the fixtures to a new type similar in appearance but LED. They are called Mitchells.

Hi Jill,

Councilmember Jonson is asking if the LED conversion is complete and if there was a press follow-up as suggested below?

This is the mail. I finally found out how to download it and then forward it. I am interested if we received a response update from her.

melissa—know we did a press availability when the first light was installed—should we do the same for the last one—gnc
