(c) Solid waste collection rates.

1. Effective January 11, 2016, solid waste collection in prescribed containers will be once weekly.

a. Single-family, multiple-family dwellings, and commercial buildings unable to have commercial container service:

(i) Curbside pickup: One residential refuse container will be provided for automated service for each living unit. Where routes are automated, automated service shall be the only collection option. Additional containers may be approved by the director of solid waste/general services at the rates specified below. Single-family dwelling residents may request additional containers, at the discounted rate detailed below, after undergoing an initial recycling assessment. The recycling assessment is offered, without charge, to residents that generate a large amount of refuse. If additional containers are provided, the director of solid waste/general services may conduct periodic recycling assessments without notice to the resident. Based on data derived from subsequent recycling assessments, the city may elect to remove any additional containers provided to the resident, at the director of solid waste/general service's sole discretion.
