Re: 445681-1 // SR 590 (CR 528/Drew St.) from Osceola Ave. to W of US 19 // City of Clearwater UWHCA request

Ms. Cormier,

The City of Clearwater Public Utilities Department (COCPU) is requesting approval by the Florida Department of Transportation for participation with a “Utility Work by Highway Contractor Agreement” (UWHCA) to execute construction of its potable water, sanitary sewer, and reclaimed water facilities within the project limits. Designs will be completed by the COCPU.

COCPU work to be constructed by Highway Contractor includes the following:

- All COCPU construction is necessary to maintain the current system local and global hydraulic capacities and mechanical functions with focus on future maintainability. Including, but not limited to, addressing system conflicts with proposed plans by FDOT, as well as other upgrades to ensure COCPU infrastructure can withstand construction activities.
- Participation in a UWHCA will also prevent future disruptions to travelers and the public at large.

The preliminary opinion of probable construction costs will be communicated to you in the coming weeks. Once the UWHCA is received, it will be processed for City Council Approval. Thank you for the opportunity to partner with FDOT through a UWHCA.

Sincerely,

Michael Flanigan
Public Utilities Interim Director
