Mr. Vacca:

Thank you for the opportunity to submit this price proposal for a SmartLevel solution to be installed for the City of Clearwater.

The SmartLevel system offers cost effective satellite manhole monitoring to eliminate sewer overflows, optimize collection system cleaning, and accurately identify inflow and infiltration (I&I). The comprehensive data management and analytics software platform allows you to efficiently manage real-time data to enhance performance, reduce costs, and optimize resources.

Additional benefits include:

- Continuous system visibility through Iridium satellite communication with no disruptions during extreme weather events or poor coverage associated with cellular networks.
- No confined space entry required, which minimizes field resources and safety hazards.
- Quick, simple manhole retrofit installation provides instant coverage.
- Mobile app delivers system insights whenever and wherever.
