

City of Clearwater Employees' Pension Plan

Actuarial Valuation Report as of January 1, 2025
Annual Employer Contribution for the Fiscal Year
Ending September 30, 2026

May 7, 2025

Board of Trustees
City of Clearwater Employees' Pension Plan
Clearwater, Florida

Dear Board Members:

The results of the January 1, 2025 Annual Actuarial Valuation of the City of Clearwater Employees' Pension Plan are presented in this report.

This report was prepared at the request of the Board and is intended for use by the Retirement System and those designated or approved by the Board. This report may be provided to parties other than the System only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The purposes of the valuation are to measure the System's funding progress and to determine the employer contribution rate for the fiscal year ending September 30, 2026. This report should not be relied on for any purpose other than the purposes described herein. Determinations of financial results, associated with the benefits described in this report, for purposes other than those identified above may be significantly different.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section B of this report. This report includes risk metrics in Section A, but does not include a robust assessment of future experience not meeting the actuarial assumptions. A robust assessment of risks was outside the scope of this assignment.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this Plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

The findings in this report are based on data or other information through December 31, 2024. The valuation was based upon information furnished by the City concerning Retirement System benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the City.

In addition, this report was prepared using certain assumptions approved by the Board as authorized under the Florida and prescribed by the Florida Statutes as described in the section of this report entitled Actuarial Assumptions and Methods. The prescribed assumptions are the assumed mortality rates detailed in the Actuarial Assumptions and Methods section in accordance with Florida Statutes, Chapter 112.63. All actuarial assumptions used in this report are reasonable for purposes of this

valuation. The combined effect of the assumptions, excluding the prescribed assumptions or methods set by law is expected to have no significant bias (i.e. not significantly optimistic or pessimistic).

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Retirement System as of the valuation date. All calculations have been made in conformity with generally accepted actuarial principles and practices, with the Actuarial Standards of Practice issued by the Actuarial Standards Board and with applicable statutes.

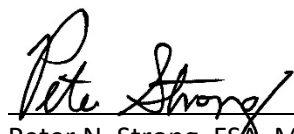

Peter N. Strong and Trisha Amrose are members of the American Academy of Actuaries. These actuaries meet the Academy's Qualification Standards to render the actuarial opinions contained herein. The signing actuaries are independent of the plan sponsor.

This actuarial valuation and/or cost determination was prepared and completed by us or under our direct supervision, and we acknowledge responsibility for the results. To the best of our knowledge, the results are complete and accurate. In our opinion, the techniques and assumptions used are reasonable, meet the requirements and intent of Part VII, Chapter 112, Florida Statutes, and are based on generally accepted actuarial principles and practices. There is no benefit or expense to be provided by the plan and/or paid from the plan's assets for which liabilities or current costs have not been established or otherwise taken into account in the valuation. All known events or trends which may require a material increase in plan costs or required contribution rates have been taken into account in the valuation.

Gabriel, Roeder, Smith & Company will be pleased to review this valuation and Report with the Board of Trustees and to answer any questions pertaining to the valuation.

Respectfully submitted,

GABRIEL, ROEDER, SMITH & COMPANY

Peter N. Strong, FSA, MAAA
Enrolled Actuary No. 23-6975

SECTION A

DISCUSSION OF VALUATION RESULTS

DISCUSSION OF VALUATION RESULTS

Comparison of Required Employer Contributions

The required employer contribution developed in this year's valuation is compared below to last year's results:

	For FYE 9/30/2026 Based on 1/1/2025 Valuation	For FYE 9/30/2025 Based on 1/1/2024 Valuation	Increase (Decrease)
Required Employer/State Contribution As % of Covered Payroll	\$ 7,334,218 6.16 %*	\$ 16,244,745 14.43 %	\$ (8,910,527) (8.27) %
Estimated State Contribution As % of Covered Payroll	12,000 0.01 %	12,000 0.01 %	0 0.00 %
Required Employer Contribution As % of Covered Payroll	7,322,218 6.15 %	16,232,745 14.42 %	(8,910,527) (8.27) %
Credit Balance	40,184,518	38,136,025	2,048,493

* Since the Actuarially Determined Contribution is under the 7% of payroll minimum, the required City contribution for FYE 2026 is 7% of payroll, which is approximately \$8.34 million based on the covered payroll as of January 1, 2025.

Required Employer Contribution by Group

The required employer contribution for each group developed in this year's valuation is shown below:

Required Employer Contribution by Group	For FYE 9/30/2026 Based on 1/1/2025 Valuation	For FYE 9/30/2025 Based on 1/1/2024 Valuation	Increase (Decrease)
Non-Hazardous As % of Covered Payroll	\$ 1,993,122 2.68 %	\$ 6,269,945 9.16 %	\$ (4,276,823) (6.48) %
Hazardous Police As % of Covered Payroll	2,469,397 10.00 %	5,127,235 21.45 %	(2,657,838) (11.45) %
Hazardous Fire As % of Covered Payroll	2,859,699 14.27 %	4,835,565 23.85 %	(1,975,866) (9.58) %
Total As % of Covered Payroll	7,322,218 6.15 %	16,232,745 14.42 %	(8,910,527) (8.27) %

The contribution has been adjusted for interest on the basis that payments are made uniformly during the first two quarters of the City's fiscal year. The required employer contribution has been computed under the assumption that the amount to be received from the State on behalf of police officers and firefighters in 2025 and 2026 will be \$12,000. If the actual payment from the State falls below this amount, then the City must increase its contribution by the difference.

The actual Employer and State contributions during the year ending December 31, 2024 were \$15,802,396 and \$12,000, respectively, for a total of \$15,814,396, compared to the required contribution of \$16,244,745. The credit balance was used to cover the contribution shortfall of \$430,349.

The minimum required City contribution is 7% of covered payroll (by Ordinance).

Revisions in Benefits

There have been no revisions in benefits since the previous valuation.

Revisions in Actuarial Assumptions or Methods

The mortality tables and improvement scales were updated to reflect the updated mortality assumptions used in the July 1, 2024 Florida Retirement System (FRS) Actuarial Valuation. Florida Statutes Chapter 112.63 mandates that local municipal pension plans use the mortality rates in either of the last two published FRS valuation reports. Please see the Actuarial Assumptions and Cost Method subsection of this report for additional information on the revised assumptions. The new assumptions have been implemented in this January 1, 2025 Actuarial Valuation Report. This assumption change caused the required contribution to increase by \$504,351, or 0.42% of covered payroll, and the funded ratio (including the credit balance in the Actuarial Value of Assets) to decrease by 1.98%.

Additionally, as of January 1, 2025, the Board of Trustees has elected to change the funding method from the Entry Age Normal Cost Method to the Aggregate Cost Method. This method change caused the required contribution to decrease by \$10,026,318, or 8.41% of covered payroll (before reflecting the 7% of payroll minimum required contribution). The funded ratio remained the same.

Actuarial Experience

There was a net actuarial experience loss of \$3,983,797 during the year, which means that actual experience was less favorable than expected. The loss is predominantly due to liability-related experience losses resulting from salary increase experience (salaries increased by 7.85% on average versus an expected average increase of 5.74%) and mortality experience (an actual decrease in annual retirement benefits of \$746,686 versus an expected decrease of \$1,395,938). These losses were partially offset by a recognized investment return (on the smoothed actuarial value of assets) slightly above the assumed rate of 6.5%. The investment return on the market value of assets was 9.92%, and the investment return was 6.51% based on the actuarial value of assets.

Looking at each group, there was a net experience loss for Non-Hazardous Employees of (\$4,335,981), a net experience loss for Police Officers of (\$2,781,117), and a net experience gain of \$3,133,301 for Firefighters. The deviating experience between the groups was mostly caused by differences in salary increase experience. Average salary increases were higher than expected for Non-Hazardous Employees (8.9% versus 5.6% expected) and Police Officers (9.1% versus 5.8% expected), but were lower than expected for Firefighters (3.0% versus 5.9% expected).

Under Chapter 112.66 of the Florida Statutes, the annual payment to amortize the UAL may not reduce the contribution required to fund the Normal Cost. As a result, since the annual payment to amortize the UAL is below \$0 as of January 1, 2025, the actuarial experience loss had no effect on the required employer contribution before the funding method change. The actuarial experience loss did cause the Plan's funded ratio to decrease by approximately 0.4%.

Analysis of Change in Employer Contribution

The components of change in the required City contribution are as follows:

Contribution Rate Last Year	14.42 %
Change in Benefits	0.00
Change in Assumptions and Methods	(7.99)
Amortization Payment on UAAL	0.00
Normal Cost	(0.29)
Experience Gain/Loss	0.00
Change in Administrative Expenses	0.01
Change in State Revenue	<u>0.00</u>
Contribution Rate This Year	6.15

Funded Ratio

One measure of the Plan's funding progress is the ratio of the actuarial value of assets to the actuarial accrued liability. Including the credit balance in the actuarial value of assets, the funded ratio is 110.02% this year (112.00% before the assumption and method changes) compared to 112.00% last year. Not including the credit balance in the actuarial value of assets, the funded ratio is 106.76% this year (108.68% before the assumption and method changes) compared to 108.74% last year.

Variability of Future Contribution Rates

The Actuarial Cost Method used to determine the contribution rate is intended to produce contribution rates which are generally level as a percent of payroll. Even so, when experience differs from the assumptions, as it often does, the employer's contribution rate can vary significantly from year-to-year.

The Actuarial Value of Assets exceeds the Market Value of Assets by \$12,444,403 as of the valuation date (see Section C). This difference will be gradually recognized in the absence of offsetting gains.

Relationship to Market Value

If Market Value had been the basis for the valuation, the contribution rate would have been 7.34% and the funded ratio (not including the credit balance) would have been 105.75%. The funded ratio based on the market value of assets (excluding the credit balance) last year was 104.34%. In the absence of other gains and losses, the City contribution rate should increase to that level over the next several years.

Conclusion

The remainder of this Report includes detailed actuarial valuation results, financial information, miscellaneous information and statistics, and a summary of plan provisions.

RISKS ASSOCIATED WITH MEASURING THE ACCRUED LIABILITY AND ACTUARIALLY DETERMINED CONTRIBUTION

The determination of the accrued liability and the actuarially determined contribution requires the use of assumptions regarding future economic and demographic experience. Risk measures, as illustrated in this report, are intended to aid in the understanding of the effects of future experience differing from the assumptions used in the course of the actuarial valuation. Risk measures may also help with illustrating the potential volatility in the accrued liability and the actuarially determined contribution that result from the differences between actual experience and the actuarial assumptions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions due to changing conditions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period, or additional cost or contribution requirements based on the Plan's funded status); and changes in plan provisions or applicable law. The scope of an actuarial valuation does not include an analysis of the potential range of such future measurements.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns;
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed resulting in actual future accrued liability and contributions differing from expected.

The effects of certain trends in experience can generally be anticipated. For example if the investment return since the most recent actuarial valuation is less (or more) than the assumed rate, the cost of the plan can be expected to increase (or decrease). Likewise if longevity is improving (or worsening), increases (or decreases) in cost can be anticipated.

The computed contribution rate shown on page 1 may be considered as a minimum contribution rate that complies with the Board's funding policy. The timely receipt of the actuarially determined contributions is critical to support the financial health of the plan. Users of this report should be aware that contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

Plan Maturity Measures

Risks facing a pension plan evolve over time. A young plan with virtually no investments and paying few benefits may experience little investment risk. An older plan with a large number of members in pay status and a significant trust may be much more exposed to investment risk. Generally accepted plan maturity measures include the following:

	1/1/2025	1/1/2024
Ratio of the market value of assets to total payroll	11.27	11.19
Ratio of actuarial accrued liability to payroll	10.34	10.40
Ratio of actives to retirees and beneficiaries	1.03	1.04
Ratio of net cash flow to market value of assets	(3.00) %	(3.23) %

Ratio of Market Value of Assets to Payroll

The relationship between assets and payroll is a useful indicator of the potential volatility of contributions. For example, if the market value of assets is 2.0 times the payroll, a return on assets 5% different than assumed would equal 10% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in plan sponsor contributions as a percentage of payroll.

Ratio of Actuarial Accrued Liability to Payroll

The relationship between actuarial accrued liability and payroll is a useful indicator of the potential volatility of contributions for a fully funded plan. A funding policy that targets a funded ratio of 100% is expected to result in the ratio of assets to payroll and the ratio of liability to payroll converging over time.

The ratio of liability to payroll may also be used as a measure of sensitivity of the liability itself. For example, if the actuarial accrued liability is 2.5 times the payroll, a change in liability 2% other than assumed would equal 5% of payroll. A higher (lower) or increasing (decreasing) level of this maturity measure generally indicates a higher (lower) or increasing (decreasing) volatility in liability (and also plan sponsor contributions) as a percentage of payroll.

Ratio of Actives to Retirees and Beneficiaries

A young plan with many active members and few retirees will have a high ratio of active to retirees. A mature open plan may have close to the same number of actives to retirees resulting in a ratio near 1.0. A super-mature or closed plan may have significantly more retirees than actives resulting in a ratio below 1.0.

Ratio of Net Cash Flow to Market Value of Assets

A positive net cash flow means contributions exceed benefits and expenses. A negative cash flow means existing funds are being used to make payments. A certain amount of negative net cash flow is generally expected to occur when benefits are prefunded through a qualified trust. Large negative net cash flows as a percent of assets may indicate a super-mature plan or a need for additional contributions.

Additional Risk Assessment

Additional risk assessment is outside the scope of the annual actuarial valuation. Additional assessment may include scenario tests, sensitivity tests, stochastic modeling, stress tests, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

LOW-DEFAULT-RISK OBLIGATION MEASURE

Actuarial Standards of Practice No. 4 (ASOP No. 4) was revised and reissued in December 2021 by the Actuarial Standards Board (ASB). It includes a calculation called a low-default-risk obligation measure (LDROM) to be prepared and issued annually for defined benefit pension plans. The transmittal memorandum for ASOP No. 4 includes the following explanation:

“The ASB believes that the calculation and disclosure of this measure provides appropriate, useful information for the intended user regarding the funded status of a pension plan. The calculation and disclosure of this additional measure is not intended to suggest that this is the “right” liability measure for a pension plan. However, the ASB does believe that this additional disclosure provides a more complete assessment of a plan’s funded status and provides additional information regarding the security of benefits that members have earned as of the measurement date.”

The following information has been prepared in compliance with this requirement. Unless otherwise noted, the measurement date, actuarial cost methods, and assumptions used are the same as for the funding valuation covered in this actuarial valuation report.

A. Low-default-risk Obligation Measure of benefits earned as of the measurement date: \$1,737,781,538

B. Discount rate used to calculate the LDROM: 3.81% based on Fidelity’s “20-Year Municipal GO AA Index” as of September 26, 2024

C. Other significant assumptions that differ from those used for the funding valuation: none

D. Actuarial cost method used to calculate the LDROM: Individual Entry-Age Actuarial Cost Method

E. Valuation procedures to value any significant plan provisions that are difficult to measure using traditional valuation procedures, and that differ from the procedures used in the funding valuation: none

F. Commentary to help the intended user understand the significance of the LDROM with respect to the funded status of the plan, plan contributions, and the security of participant benefits: The LDROM is a market-based measurement of the pension obligation. It estimates the amount the plan would need to invest in low risk securities to provide the benefits with greater certainty. This measure may not be appropriate for assessing the need for or amount of future contributions. This measure may not be appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan’s benefit obligation.

The difference between the two measures (Valuation and LDROM) is one illustration of the savings the sponsor anticipates by taking on the risk in a diversified portfolio.

**CALCULATION OF EMPLOYER NORMAL COST - PRIOR YEAR
ENTRY AGE NORMAL METHOD**

A. Valuation Date	January 1, 2024	January 1, 2024	January 1, 2024	January 1, 2024
	<i>Total</i>	<i>Non-Hazardous</i>	<i>Hazardous Police</i>	<i>Hazardous Fire</i>
B. Normal Cost for				
1. Service Retirement Benefits	\$ 17,657,942	\$ 7,481,716	\$ 5,005,828	\$ 5,170,398
2. Vesting	3,914,959	2,625,437	814,487	475,035
3. Disability Benefits	1,973,738	207,280	1,072,853	693,605
4. Death Benefits	315,174	202,741	51,739	60,694
5. Refund of Contributions	<u>915,093</u>	<u>660,929</u>	<u>154,291</u>	<u>99,873</u>
6. Total for Future Benefits	24,776,906	11,178,103	7,099,198	6,499,605
7. Assumed Amount for Administrative Expenses	<u>363,156</u>	<u>183,716</u>	<u>106,715</u>	<u>72,725</u>
8. Total Normal Cost	25,140,062	11,361,819	7,205,913	6,572,330
C. Expected Member Contributions	9,886,781	5,474,547	2,385,035	2,027,199
D. Employer Normal Cost: B8 - C	15,253,281	5,887,272	4,820,878	4,545,131
E. Employer Normal Cost as % of Covered Payroll	13.55%	8.60%	20.17%	22.42%

Reconciliation of Credit Balance				
	Total	Non-Hazardous	Hazardous Police	Hazardous Fire
Credit Balance at Beginning of Year	\$ 38,136,025	\$ 18,881,255	\$ 11,186,410	\$ 8,068,360
Required Employer Contribution	- 16,232,745	- 6,269,945	- 5,127,235	- 4,835,565
Employer Contribution Made	+ 15,802,396	+ 5,543,589	+ 5,703,357	+ 4,555,450
Interest on Credit Balance	+ 2,478,842	+ 1,227,282	+ 727,117	+ 524,443
Credit Balance at End of Year	40,184,518	19,382,181	12,489,649	8,312,688

ACTUARIAL GAINS AND LOSSES

The assumptions used to anticipate mortality, employment turnover, investment income, expenses, salary increases, and other factors have been based on long range trends and expectations. Actual experience can vary from these expectations. The variance is measured by the gain and loss for the period involved. If significant long-term experience reveals consistent deviation from what has been expected and that deviation is expected to continue, the assumptions should be modified. The net actuarial gain (loss) for the past year is computed as follows:

A. Derivation of the Current UAAL	Total	Non-Hazardous	Hazardous Police	Hazardous Fire
1. Last Year's UAAL	\$ (102,311,003)	\$ (47,010,142)	\$ (36,019,897)	\$ (19,280,964)
2. Employer Normal Cost for Contribution Year	15,253,281	5,887,272	4,820,878	4,545,131
3. Last Year's Contributions	16,244,745	6,269,945	5,134,235	4,840,565
4. Interest at the Assumed Rate on:				
a. 1 and 2 for one year	(5,658,752)	(2,672,987)	(2,027,936)	(957,829)
b. 3 from dates paid	66,336	25,472	21,057	19,807
c. a - b	(5,725,088)	(2,698,459)	(2,048,993)	(977,636)
5. This Year's Expected UAAL: 1 + 2 - 3 + 4c	(109,027,555)	(50,091,274)	(38,382,247)	(20,554,034)
6. This Year's Actual UAAL (Before any changes in benefits and assumptions)	(105,043,758)	(45,755,293)	(35,601,130)	(23,687,335)
7. Net Actuarial Gain (Loss): (5) - (6)	(3,983,797)	(4,335,981)	(2,781,117)	3,133,301
8. Gain (Loss) Due to Investments	352,333			
9. Gain (Loss) Due to other sources	(4,336,130)			

Gains (losses) in previous years have been as follows:

Year Ending 12/31	Gain (Loss)	Change in Employer Cost Rate*
2009	\$32,358,262	(4.89) %
2010	2,311,412	(0.37)
2011	(13,721,771)	2.28
2012	(7,015,253)	1.15
2013	62,452,347	(11.02)
2014	34,213,347	(6.01)
2015	(475,313)	0.07 **
2016	18,096,188	(2.51) **
2017	11,075,148	(1.48) **
2018	(5,803,978)	0.75 **
2019	1,188,833	(0.14) **
2020	45,746,487	(5.30) **
2021	65,543,127	(7.43) **
2022	(21,868,907)	2.30 **
2023	(3,947,385)	0.37 **
2024	(3,983,797)	0.36 **

* Before 2015, Change in Normal Cost Rate.

** Before reflecting Chapter 112.66 of the Florida Statutes. Since the annual payment to amortize the UAAL is less than \$0, the net effect of these gains and losses on the required employer contribution is \$0 or limited after reflecting Chapter 112.66 of the Florida Statutes (the requirement to fund at least the normal cost).

The fund earnings and salary increase assumptions have considerable impact on the cost of the Plan so it is important that they are in line with the actual experience. The following table shows the actual fund earnings and salary increase rates compared to the assumed rates for the last few years:

Year Ending	Investment Return		Salary Increases	
	Actual	Assumed	Actual	Assumed
12/31/1986	N/A	7.00 %	7.40 %	5.00 %
12/31/1987	N/A	7.00	5.90	5.00

ACTUARIAL ASSUMPTIONS AND COST METHOD

Valuation Methods

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date were determined using the **Aggregate Method**. The excess of the Actuarial Present Value of Projected Benefits of the group included in the valuation, over the sum of the Actuarial Value of Assets and the Actuarial Present Value of Future Member Contributions (if any) is allocated as a level percentage of earnings of the group between the valuation date and the assumed retirement age. This allocation is performed for the group as a whole, not as a sum of individual allocations. The portion of this Actuarial Present Value allocated to a specific year is called the Employer Normal Cost.

Under this method, actuarial gains and losses, plan amendments, and changes in actuarial assumptions and methods reduce or increase future Normal Costs.

Actuarial Value of Assets - The Actuarial Value of Assets phase in the difference between the expected and actual return on market value of assets at the rate of 20% per year. The Actuarial Value of Assets will be further adjusted to the extent necessary to fall within the corridor whose lower limit is 80% of the Market Value of plan assets and whose upper limit is 120% of the Market Value of plan assets. During periods when investment performance exceeds the assumed rate, Actuarial Value of Assets will tend to be less than Market Value. During periods when investment performance is less than assumed rate, Actuarial Value of Assets will tend to be greater than Market Value.

Valuation Assumptions

The actuarial assumptions used in the valuation are shown in this Section. Both the economic and decrement assumptions were established following the Experience Investigation for the Five Years Ended December 31, 2022, dated September 29, 2023. The mortality assumption is mandated by Chapter 112.63, Florida Statutes.

Economic Assumptions

The investment return rate assumed in the valuation is 6.5% per year, compounded annually (net rate after investment expenses).

The **Inflation Rate** assumed in this valuation is 2.40% per year. The Inflation Rate is defined to be the expected long-term rate of increases in the prices of goods and services. This assumption was changed this year (based on the results of a 5-year experience study) from 2.25%.

The assumed **real rate of return** over inflation is defined to be the portion of total investment return that is more than the assumed inflation rate. Considering other economic assumptions, the 6.5% investment return rate translates to an assumed real rate of return over inflation of 4.10%.

The rate of salary increase used for individual members can be seen in the tables below. Part of the assumption is for merit and/or seniority increases and productivity increases, and 2.40% recognizes inflation. This assumption is used to project a member's current salary to the salaries upon which benefits will be based.

% Increase in Salary - Firefighters

Years of Service	Merit and Seniority	Inflation	Total Increase
Under 5	5.35%	2.40%	7.75%
5 - 14	4.00%	2.40%	6.40%
15 - 19	2.85%	2.40%	5.25%
20 & Over	2.00%	2.40%	4.40%

% Increase in Salary - Police Officers

Years of Service	Merit and Seniority	Inflation	Total Increase
Under 5	6.60%	2.40%	9.00%
5 - 9	3.85%	2.40%	6.25%
10 - 14	2.60%	2.40%	5.00%
15 & Over	1.35%	2.40%	3.75%

% Increase in Salary - Non-Hazardous Duty

Years of Service	Merit and Seniority	Inflation	Total Increase
Under 2	5.60%	2.40%	8.00%
2 - 9	3.60%	2.40%	6.00%
10 - 14	3.35%	2.40%	5.75%
15 - 19	2.60%	2.40%	5.00%
20 and Higher	1.10%	2.40%	3.50%

Demographic Assumptions

The mortality tables used in the valuation for Hazardous Duty members are based on the PUB-2010 Benefits Weighted Mortality Tables described below, with mortality improvements projected for all lives to all future years after 2010 using Scale MP-2021.

	Pre-Retirement PUB-2010 Table	Post-Retirement PUB-2010 Table
Female Healthy	Benefits Weighted Safety Employee Female Table	Benefits Weighted Safety Healthy Retiree Female Table
Male Healthy	Benefits Weighted Safety Employee Male Table, set forward 1 year	Benefits Weighted Safety Healthy Retiree Male Table, set forward 1 year
Female Disabled	N/A	Headcount Weighted General Disabled Retiree Female Table, set forward 1 year
Male Disabled	N/A	Headcount Weighted General Disabled Retiree Male Table

These are the same rates used for Special Risk Class members of the Florida Retirement System (FRS) in the July 1, 2024 FRS Actuarial Valuation Report. Florida Statutes Chapter 112.63(1)(f) mandates the use of the same mortality tables used by the FRS in either of its two most recently published actuarial valuation reports.

The following table presents post-retirement mortality rates and life expectancies at illustrative ages. These assumptions are used to measure the probabilities of each benefit payment being made after retirement.

FRS Healthy Post-Retirement Mortality for Special Risk Class Members

Sample Attained Ages (in 2025)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.20 %	0.13 %	34.83	37.81
55	0.32	0.25	29.78	32.70
60	0.57	0.45	24.92	27.78
65	0.98	0.72	20.34	23.11
70	1.61	1.15	16.10	18.70
75	2.77	1.97	12.26	14.61
80	5.02	3.53	8.93	10.98

The following tables present pre-retirement mortality rates and life expectancies at illustrative ages. These assumptions are used to measure the probabilities of active members dying prior to retirement. All Police and 90% of Firefighters' deaths before retirement are assumed to be non-service connected.

FRS Healthy Pre-Retirement Mortality for Special Risk Class Members

Sample Attained Ages (in 2025)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.12 %	0.08 %	37.31	40.61
55	0.18	0.12	32.21	35.50
60	0.29	0.17	27.20	30.44
65	0.46	0.21	22.32	25.42
70	0.79	0.39	17.61	20.48
75	1.41	0.77	13.13	15.70
80	5.02	1.60	8.93	11.19

The following table presents disabled post-retirement mortality rates and life expectancies at illustrative ages.

FRS Disabled Mortality for Special Risk Class Members

Sample Attained Ages (in 2025)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	1.61 %	1.38 %	25.55	28.20
55	2.09	1.73	22.07	24.57
60	2.73	2.14	18.92	21.18
65	3.36	2.41	16.06	17.92
70	3.96	2.88	13.35	14.66
75	4.99	4.01	10.70	11.51
80	7.06	6.23	8.23	8.71

The mortality tables used in the valuation for Non-Hazardous Duty members are based on the PUB-2010 Headcount Weighted Mortality Tables described below, with mortality improvements projected for all lives to all future years after 2010 using Scale MP-2021.

	Pre-Retirement PUB-2010 Table	Post-Retirement PUB-2010 Table
Female Healthy	Headcount Weighted General Employee Female Table	Headcount Weighted General Healthy Retiree Female Table
Male Healthy	Headcount Weighted General Employee Male Table, set back 1 year	Headcount Weighted General Healthy Retiree Male Table, set back 1 year
Female Disabled	N/A	Headcount Weighted General Disabled Retiree Female Table, set forward 4 years
Male Disabled	N/A	Headcount Weighted General Disabled Retiree Male Table, set forward 4 years

These are the same rates used for Regular Class members (other than K-12 School Instructional Personnel) of the Florida Retirement System (FRS) in the July 1, 2024 FRS Actuarial Valuation Report. Florida Statutes Chapter 112.63(1)(f) mandates the use of the mortality tables from either of the two most recently published actuarial valuation reports of FRS.

The following table presents post-retirement mortality rates and life expectancies at illustrative ages. These assumptions are used to measure the probabilities of each benefit payment being made after retirement.

FRS Healthy Post-Retirement Mortality for Non-Special Risk Class Members

Sample Attained Ages (in 2025)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.15 %	0.35 %	35.11	37.77
55	0.57	0.39	30.36	33.00
60	0.77	0.47	25.83	28.25
65	1.03	0.64	21.46	23.58
70	1.50	1.00	17.28	19.09
75	2.43	1.72	13.40	14.88
80	4.22	3.16	9.97	11.09

The following tables present pre-retirement mortality rates and life expectancies at illustrative ages. These assumptions are used to measure the probabilities of active members dying prior to retirement. All deaths before retirement are assumed to be non-service connected.

FRS Healthy Pre-Retirement Mortality for Non-Special Risk Class Members

Sample Attained Ages (in 2025)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.15 %	0.09 %	38.57	40.50
55	0.23	0.14	33.56	35.40
60	0.35	0.21	28.66	30.38
65	0.50	0.31	23.89	25.45
70	0.68	0.45	19.23	20.61
75	1.01	0.74	14.67	15.89
80	1.62	1.25	10.22	11.30

The following table presents disabled post-retirement mortality rates and life expectancies at illustrative ages.

FRS Disabled Mortality for Non-Special Risk Class Members

Sample Attained Ages (in 2025)	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	2.01 %	1.52 %	22.86	26.19
55	2.46	1.90	19.60	22.60
60	3.24	2.39	16.55	19.24

75	6.53	5.07	8.84	9.94
80	9.55	8.08	6.66	7.40

The rates of retirement used to measure the probability of eligible members retiring under normal and early retirement eligibility during the next year were as follows:

Firefighters Retirement

Years of Service	Age	Probability of Retirement
10 - 19	50 - 54	5 %
	55 - 59	15
	60 & Over	40
20 - 24	Under 59	15
	60 - 64	40
	65 & Over	100
25 - 29	Under 55	15
	55 - 59	35
	60 - 64	40
	65 & Over	100
30 & Over		100

Police Officers Retirement

Years of Service	Age	Probability of Retirement
10 - 19	50 - 54	5 %
	55 - 59	8
	60 - 64	20
	65 & Over	100
20 - 29	Under 50	12
	50 - 59	20
	60 - 64	40
	65 & Over	100
30 - 34	Under 55	20
	55 - 59	30
	60 & Over	100
35 & Over		100

Non-Hazardous Duty Retirement

Years of Service	Age	Probability of Retirement
5 - 9	65 - 74	20 %
	75 & Over	100
10 - 19	65 - 74	30
	75 & Over	100
20 - 29	55 - 59	20
	60 - 64	15
	65 - 69	30
	70 & Over	100
30 & Over	Under 55	30
	55 - 64	20
	65 - 69	50
	70 & Over	100

Rates of separation from active membership were as shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members separating from employment prior to becoming eligible for retirement.

Firefighter Withdrawal - Males			Firefighter Withdrawal - Females		
Years of Service	Age	% of Active Members Separating Within Next Year	Years of Service	Age	% of Active Members Separating Within Next Year
Under 2	Under 30	8.0 %	All Years	Under 40	5.0 %
	30 & Over	4.0		40 & Over	2.0
2 - 4	Under 30	5.0			
	30 & Over	3.0			
5 & Over	Under 30	8.0			
	30 & Over	1.8			
Police Officer Withdrawal - Males			Police Officer Withdrawal - Females		
Years of Service	Age	% of Active Members Separating Within Next Year	Years of Service	Age	% of Active Members Separating Within Next Year
Under 3	Under 30	7.5 %	Under 2	All Ages	14.0 %
	30 & Over	4.0			
3 - 4	Under 30	5.5	2 - 3	All Ages	6.0
	30 & Over	3.5	4 & Over	All Ages	3.9
5 & Over	Under 30	3.5			
	30 & Over	2.6			
Non-Hazardous Duty Withdrawal - Males			Non-Hazardous Duty Withdrawal - Females		
Years of Service	Age	% of Active Members Separating Within Next Year	Years of Service	Age	% of Active Members Separating Within Next Year

Changes Since Prior Valuation

The mortality tables and improvement scales were updated to reflect the updated mortality assumptions used in the July 1, 2024 Florida Retirement System (FRS) Actuarial Valuation. Florida Statutes Chapter 112.63 mandates that local municipal pension plans use the mortality rates in either of the last two published FRS valuation reports.

Additionally, as of January 1, 2025, the Board of Trustees has elected to change the funding method from the Entry Age Normal Cost Method to the Aggregate Cost Method.

Miscellaneous and Technical Assumptions

<i>Administrative & Investment Expenses</i>	The investment return assumption is intended to be the net return after investment expenses. Annual administrative expenses are assumed to be equal to the administrative expenses of the previous year. Assumed administrative expenses are added to the Normal Cost.
<i>Benefit Service</i>	Exact fractional service is used to determine the amount of benefit payable.
<i>Cost of Living Increases</i>	The adjustment is 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.
<i>Decrement Operation</i>	Disability and mortality decrements operate during retirement eligibility.
<i>Decrement Timing</i>	Decrement of all types are assumed to occur at the beginning of the year.
<i>Eligibility Testing</i>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<i>Forfeitures</i>	For vested separations from service, it is assumed that 0% of members separating will withdraw their contributions and forfeit an employer financed benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
<i>Incidence of Contributions</i>	Employer contributions are assumed to be made in equal installments during the first two quarters of the fiscal year. Member contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.

Marriage Assumption

75% of males and 65% of females are assumed to be married for purposes of death-in-service benefits and to determine the normal form of benefit when applicable. Male spouses are assumed to be two years older than female spouses for all active members and for members who became inactive before January 1, 2015. For members who became inactive on or after January 1, 2015, spouses ages are based on the beneficiary dates of birth provided by the Plan Administrator.

Normal Form of Benefit

The normal form of benefit is a life annuity for non-grandfathered non-hazardous duty members. For all other members, the normal form of benefit is a life annuity that includes a survivor benefit where after the participant's death, 100% is payable to the spouse for five years, after which the benefit is reduced to 50%.

Pay Increase Timing

End of fiscal year. This is equivalent to assuming that reported pays represent the annual rate of pay on the valuation date. The pay used for the valuation is equal to the greater of the actual pay for the plan year increased by the salary scale assumption rate (which varies by years of service) and the annual rate of pay on the valuation date.

Service Credit Accruals

It is assumed that members accrue one year of service credit per year.

GLOSSARY

<i>Actuarial Accrued Liability (AAL)</i>	The difference between the Actuarial Present Value of Future Benefits, and the Actuarial Present Value of Future Normal Costs.
<i>Actuarial Assumptions</i>	Assumptions about future plan experience that affect costs or liabilities, such as: mortality, withdrawal, disablement, and retirement; future increases in salary; future rates of investment earnings; future investment and administrative expenses; characteristics of members not specified in the data, such as marital status; characteristics of future members; future elections made by members; and other items.
<i>Actuarial Cost Method</i>	A procedure for allocating the Actuarial Present Value of Future Benefits between the Actuarial Present Value of Future Normal Costs and the Actuarial Accrued Liability.
<i>Actuarial Equivalent</i>	Of equal Actuarial Present Value, determined as of a given date and based on a given set of Actuarial Assumptions.
<i>Actuarial Present Value (APV)</i>	The amount of funds required to provide a payment or series of payments in the future. It is determined by discounting the future payments with an assumed interest rate and with the assumed probability each payment will be made.
<i>Actuarial Present Value of Future Benefits (APVFB)</i>	The Actuarial Present Value of amounts which are expected to be paid at various future times to active members, retired members, beneficiaries receiving benefits, and inactive, nonretired members entitled to either a refund or a future retirement benefit. Expressed another way, it is the value that would have to be invested on the valuation date so that the amount invested plus investment earnings would provide sufficient assets to pay all projected benefits and expenses when due.
<i>Actuarial Valuation</i>	The determination, as of a valuation date, of the Normal Cost, Actuarial Accrued Liability, Actuarial Value of Assets, and related Actuarial Present Values for a plan. An Actuarial Valuation for a governmental retirement system typically also includes calculations of the Funded Ratio and the Actuarially Determined Contribution (ADC).
<i>Actuarial Value of Assets</i>	The value of the assets as of a given date, used by the actuary for valuation purposes. This may be the market or fair value of plan assets or a smoothed value in order to reduce the year-to-year volatility of calculated results, such as the funded ratio and the Actuarially Determined Contribution (ADC).

<i>Actuarially Determined Contribution (ADC)</i>	The employer's periodic required contributions, expressed as a dollar amount or a percentage of covered plan compensation. The ADC consists of the Employer Normal Cost and Amortization Payment.
<i>Amortization Method</i>	A method for determining the Amortization Payment. The most common methods used are level dollar and level percentage of payroll. Under the Level Dollar method, the Amortization Payment is one of a stream of payments, all equal, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the Amortization Payment is one of a stream of increasing payments, whose Actuarial Present Value is equal to the UAAL. Under the Level Percentage of Pay method, the stream of payments increases at the rate at which total covered payroll of all active members is assumed to increase.
<i>Amortization Payment</i>	That portion of the plan contribution or ADC which is designed to pay interest on and to amortize the Unfunded Actuarial Accrued Liability.
<i>Amortization Period</i>	The period used in calculating the Amortization Payment.
<i>Closed Amortization Period</i>	A specific number of years that is reduced by one each year, and declines to zero with the passage of time. For example if the amortization period is initially set at 30 years, it is 29 years at the end of one year, 28 years at the end of two years, etc.
<i>Employer Normal Cost</i>	The portion of the Normal Cost to be paid by the employer. This is equal to the Normal Cost less expected member contributions.
<i>Equivalent Single Amortization Period</i>	For plans that do not establish separate amortization bases (separate components of the UAAL), this is the same as the Amortization Period. For plans that do establish separate amortization bases, this is the period over which the UAAL would be amortized if all amortization bases were combined upon the current UAAL payment.
<i>Experience Gain/Loss</i>	A measure of the difference between the normal cost rate from last year and the normal cost rate from this year.
<i>Funded Ratio</i>	The ratio of the Actuarial Value of Assets to the Actuarial Accrued Liability.
<i>Normal Cost</i>	The annual cost assigned, under the Actuarial Cost Method, to the current plan year.

<i>Open Amortization Period</i>	An open amortization period is one which is used to determine the Amortization Payment but which does not change over time. In other words, if the initial period is set as 30 years, the same 30-year period is used in determining the Amortization Period each year. In theory, if an Open Amortization Period is used to amortize the Unfunded Actuarial Accrued Liability, the UAAL will never completely disappear, but will become smaller each year, either as a dollar amount or in relation to covered payroll.
<i>Unfunded Actuarial Accrued Liability</i>	The difference between the Actuarial Accrued Liability and Actuarial Value of Assets.
<i>Valuation Date</i>	The date as of which the Actuarial Present Value of Future Benefits are determined. The benefits expected to be paid in the future are discounted to this date.

F6. Total Phase-Ins	20,646,468	3,696,006	(15,056,132)	(30,766,924)	24,840,109	8,538,544
G. Actuarial Value of Assets End of Year						
G1. Preliminary Actuarial Value of Assets	\$ 1,311,236,406	\$ 1,355,029,043				
G2. Upper Corridor Limit: 120%*B	\$ 1,511,754,347	\$ 1,611,101,568				
G3. Lower Corridor Limit: 80%*B	\$ 1,007,836,231	\$ 1,074,067,712				
G4. Funding Value End of Year	\$ 1,311,236,406	\$ 1,355,029,043				
G5. Credit Balance	\$ 38,136,025	\$ 40,184,518				
G6. Final Actuarial Value of Assets	\$ 1,273,100,381	\$ 1,314,844,525				
H. Recognized Investment Earnings	\$ 93,597,973	\$ 84,004,324				
I. Difference between Market & Actuarial Value	\$ (51,441,117)	\$ (12,444,403)				
J. Actuarial Rate of Return	7.56%	6.51%				
K. Market Value Rate of Return	13.72%	9.92%				
L. Ratio of Actuarial Value of Assets to Market Value	104.08%	100.93%				

The Actuarial Value of Assets recognizes assumed investment return (line E3) fully each year. Differences between actual and assumed investment income (Line E4) are phased-in over a closed 5-year period. During periods when investment performance exceeds the assumed rate, Actuarial Value of Assets will tend to be less than Market Value. During periods when investment performance is less than the assumed rate, Actuarial Value of Assets will tend to be greater than Market Value. If assumed rates are exactly realized for 5 consecutive years, Actuarial Value of Assets will become equal to Market Value.

Allocation of Plan Assets by Group

Item	Total	Non-Hazardous	Hazardous Police	Hazardous Fire
A. Market Value of Assets as of January 1, 2024	\$ 1,259,795,289	\$ 635,755,587	\$ 371,085,737	\$ 252,953,965
B. Contributions (All)	25,861,182	11,257,943	8,133,293	6,469,946
C. Net Investment Return	123,001,038	61,930,743	36,281,471	24,788,824

2022	(14.02)	6.08
2023	13.72	7.56
2024	9.92	6.51
Average returns:		
Last five years:	6.91 %	8.71 %
Last ten years:	7.29 %	8.14 %
All years:	8.92 %	8.01 %

**Before investment expenses prior to 2013.*

The above rates are based on the retirement system's financial information reported to the actuary. They may differ from figures that the investment consultant reports, in part because of differences in the handling of administrative and investment expenses, and in part because of differences in the handling of cash flows.

SECTION D

FINANCIAL ACCOUNTING INFORMATION

FASB NO. 35 INFORMATION

A. Valuation Date	January 1, 2025	January 1, 2024
B. Actuarial Present Value of Accumulated Plan Benefits		
1. Vested Benefits		
a. Members Currently Receiving Payments	\$ 814,533,109	\$ 779,015,597
b. Terminated Vested Members	20,509,042	22,663,248
c. Other Members	271,840,213	250,492,308
d. Total	<u>1,106,882,364</u>	<u>1,052,171,153</u>
2. Non-Vested Benefits	22,051,778	21,185,334
3. Total Actuarial Present Value of Accumulated Plan Benefits: 1d + 2	1,128,934,142	1,073,356,487
4. Accumulated Contributions of Active Members	70,149,013	66,583,287
C. Changes in the Actuarial Present Value of Accumulated Plan Benefits		
1. Total Value at Beginning of Year	1,073,356,487	1,043,838,470
2. Increase (Decrease) During the Period Attributable to:		
a. Plan Amendment	0	0
b. Change in Actuarial Assumptions	18,912,724	(8,454,351)
c. Latest Member Data, Benefits Accumulated and Decrease in the Discount Period	102,345,442	101,070,595
d. Benefits Paid	<u>(65,680,511)</u>	<u>(63,098,227)</u>
e. Net Increase	55,577,655	29,518,017
3. Total Value at End of Period	1,128,934,142	1,073,356,487
D. Market Value of Assets	1,342,584,640	1,259,795,289
E. Actuarial Assumptions - See page entitled Actuarial Assumptions and Methods		

SECTION E

MISCELLANEOUS INFORMATION

RECONCILIATION OF MEMBERSHIP DATA		
	From 1/1/2024 To 1/1/2025	From 1/1/2023 To 1/1/2024
A. Active Members		
1. Number Included in Last Valuation	1,556	1,506
2. New Members Included in Current Valuation	179	233
3. Non-Vested Employment Terminations	(100)	(83)
4. Vested Employment Terminations	(21)	(47)
5. Service Retirements	(40)	(52)
6. Disability Retirements	0	(2)
7. Deaths	(2)	(3)
8. Rehired Members/Data Corrections	0	4
9. Number Included in This Valuation	1,572	1,556
B. Terminated Vested Members		
1. Number Included in Last Valuation	91	82
2. Additions from Active Members	21	47
3. Lump Sum Payments/Refund of Contributions	(10)	(25)
4. Payments Commenced	(12)	(11)
5. Deaths	1	0
6. Conversion to Disability/Rehired Members	0	(1)
7. Data Corrections	0	(1)
8. Number Included in This Valuation	91	91
C. Service Retirees, Disability Retirees and Beneficiaries		
1. Number Included in Last Valuation	1,496	1,447
2. Additions from Active Members	40	54
3. Additions from Terminated Vested Members	12	11
4. Deaths Resulting in No Further Payments	(24)	(17)
5. Deaths Resulting in New Survivor Benefits	0	3
6. End of Certain Period - No Further Payments	(1)	(1)
7. Data Correction/Waiver of Benefits	0	(1)
8. Number Included in This Valuation	1,523	1,496

SECTION F

SUMMARY OF PLAN PROVISIONS

SUMMARY OF PLAN PROVISIONS

A. Ordinances

The Plan was established under the Code of Ordinances for the City of Clearwater, Florida, Chapter 2, Article V, Division 3 and was most recently amended under Ordinance No. 9620-22 passed and adopted on November 17, 2022. The Plan is also governed by certain provisions of Part VII, Chapter 112, Florida Statutes (F.S.) and the Internal Revenue Code.

B. Effective Date

Restated Plan Effective Date: January 1, 2013 (previous restated Plan Effective Date was January 1, 1996).

C. Plan Year

January 1 through December 31.

D. Type of Plan

Qualified, governmental defined benefit retirement plan; for GASB purposes it is a single employer plan.

E. Eligibility Requirements

All full-time permanent employees of the City are required to participate and become participants on their date of hire.

F. Grandfathered Members

Members who are eligible for normal retirement as of January 1, 2013 are grandfathered in the plan provisions in effect before Ordinance No. 8333-12.

G. Credited Service

Credited Service is measured as the total number of years and fractional parts of years from the date of employment to the date of termination or retirement. No service is credited for any periods of employment for which a participant received a refund of their contributions.

H. Compensation

The total compensation for services rendered to the City reportable on the participant's W-2 form, plus all tax deferred, tax sheltered or tax exempt items of income derived from elective employee payroll deductions or salary reductions, but excluding any lump sum payments of unused vacation and sick leave, pay for off-duty employment, and clothing, car or meal allowances.

Effective January 1, 2013: For non-grandfathered hazardous duty members, the amount of overtime included in Compensation is limited to 300 hours per year; For non-grandfathered non-hazardous duty members, Compensation excludes overtime and additional pay above the base rate of pay.

I. Average Monthly Compensation (AMC)

One-twelfth of the average of Compensation during the highest 5 years out of the last 10 years preceding termination or retirement.

J. Normal Retirement

Eligibility: For Non-Hazardous Duty

A participant hired before January 1, 2013 may retire on the first day of the month coincident with or next following the earliest of:

- (1) age 55 with 20 years of Credited Service, or
- (2) 30 years of Credited Service regardless of age, or
- (3) age 65 with 10 years of Credited Service.

A participant hired on or after January 1, 2013 may retire on the first day of the month coincident with or next following the earliest of:

- (1) age 60 with 25 years of Credited Service, or
- (2) age 65 with 5 years of Credited Service

For Hazardous Duty Police Officers and Firefighters

A participant may retire on the first day of the month coincident with or next following the earlier of:

- (1) age 55 with 10 years of Credited Service, or
- (2) 20 years of Credited Service regardless of age.

Benefit: 2.75% of AMC multiplied by years of Credited Service.

For Non-Hazardous Duty participants hired on or after January 1, 2013, 2.00% of AMC multiplied by years of Credited Service through September 30, 2022 plus 2.50% of AMC multiplied by years of Credited Service after September 30, 2022.

Normal Form
of Benefit: For Non-Hazardous Duty (Non-Grandfathered)

A monthly annuity is paid for the life of the participant.

For Hazardous Duty Police Officers and Firefighters (and Grandfathered Non-Hazardous Duty)

A monthly annuity is paid for the life of the participant. After the participant's death, 100% of the Normal Retirement Benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters. Optional forms of benefits are available.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

K. Early Retirement

Eligibility: Police Officers and Firefighters may elect to retire earlier than the Normal Retirement Eligibility upon the attainment of age 50 with 10 years of Credited Service.

Benefit: The Normal Retirement Benefit is reduced by 3.0% for each year by which the Early Retirement date precedes age 55.

Normal Form
of Benefit: A monthly annuity is paid for the life of the participant. After the participant's death, 100% of the Normal Retirement Benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters. Optional forms of benefits are available.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

L. Delayed Retirement

Same as Normal Retirement taking into account Compensation earned and service credited until the date of actual retirement.

M. Service Connected Disability

Eligibility: Any participant who becomes totally and permanently disabled due to an illness or injury contracted in the line of duty and is deemed to be unable to perform useful and efficient service to the City is immediately eligible for a disability benefit.

Benefit: For Non-Hazardous Duty

Participant's accrued Normal Retirement Benefit taking into account Compensation earned and service credited until the date of disability. Benefit is guaranteed to be no less than 42% of the participant's AMC (66 2/3% of the participant's AMC if grandfathered). Disability benefits, when combined with Worker's Compensation benefits, cannot exceed and will be limited to 100% of the participant's AMC on the date of disability.

For Hazardous Duty Police Officers and Firefighters

Participant's accrued Normal Retirement Benefit taking into account Compensation earned and service credited until the date of disability. Benefit is guaranteed to be no less than 66 2/3% of the participant's AMC. Disability benefits, when combined with Worker's Compensation benefits, cannot exceed and will be limited to 100% of the participant's AMC on the date of disability.

Normal Form of Benefit: For Non-Hazardous Duty (Non-Grandfathered)

A monthly annuity is paid for the life of the participant.

For Hazardous Duty Police Officers and Firefighters (and Grandfathered Non-Hazardous Duty)

A monthly annuity is paid for the life of the participant. After the participant's death, 100% of the Normal Retirement Benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters. Optional forms of benefits are available.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

N. Non-Service Connected Disability

Eligibility: Any Hazardous Duty participant who has 10 or more years of Credited Service or Non-Hazardous Duty participant who has 5 or more years of Credited Service, becomes totally and permanently disabled, and is deemed to be unable to perform useful and efficient service to the City is immediately eligible for a disability benefit.

Benefit: Participant's accrued Normal Retirement Benefit taking into account Compensation earned and service credited until the date of disability. Disability benefits, when combined with Worker's Compensation benefits, cannot exceed and will be limited to 100% of the participant's AMC on the date of disability.

Normal Form
of Benefit: For Non-Hazardous Duty (Non-Grandfathered)

A monthly annuity is paid for the life of the participant.

For Hazardous Duty Police Officers and Firefighters (and Grandfathered Non-Hazardous Duty)

A monthly annuity is paid for the life of the participant. After the participant's death, 100% of the Normal Retirement Benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters. Optional forms of benefits are available.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

O. Death in the Line of Duty

Eligibility: Any participant whose employment is terminated by reason of death in the line of duty is eligible for survivor benefits.

Benefit: Beneficiary will be paid the participant's accrued benefit based upon Credited Service and AMC as of the date of death. Benefit is guaranteed to be no less than 66 2/3% of the participant's AMC.

Normal Form of Benefit: 100% of the participant's accrued benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

In lieu of the benefits described above, the participant's beneficiary can elect to receive a refund of participant's accumulated contributions with interest.

P. Other Pre-Retirement Death

Eligibility: Any Hazardous Duty participant who dies with 10 or more years of Credited Service or Non-Hazardous Duty participant who dies with 5 or more years of Credited Service is eligible for survivor benefits.

Benefit: Beneficiary will be paid the participant's accrued benefit based upon Credited Service and AMC as of the date of death.

Normal Form

of Benefit: 100% of the participant's accrued benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

In lieu of the benefits described above, a participant's beneficiary can elect to receive a refund of the participant's accumulated contributions with interest. Accumulated contributions, plus interest, will be refunded for all Hazardous Duty participants with less than 10 years of Credited Service or Non-Hazardous Duty participants with less than 5 years of Credited Service.

Q. Post Retirement Death

Benefit determined by the form of benefit elected upon retirement.

R. Optional Forms

In lieu of electing the Normal Form of benefit, the optional forms of benefits available to all retirees are a Single Life Annuity, a 10 Year Certain and Life Annuity, or the 50%, 66 2/3% (for police officers and firefighters), 75% or 100% Joint and Survivor options. Members may also elect a partial lump sum equal to 10%, 20%, or 30% of the value of the normal retirement benefit with the remaining monthly retirement benefit reduced accordingly.

S. Vested Termination

Eligibility: A participant has earned a non-forfeitable right to Plan benefits after the completion of 10 years of Credited Service for Hazardous Duty or 5 years of Credited Service for Non-Hazardous Duty provided employee contributions are not refunded.

Vesting is determined in accordance with the following tables.

Hazardous Duty Members

Years of Credited Service	% of Normal Retirement Benefits
Less Than 10	0%
10 or more	100%

Non-Hazardous Duty Members

Years of Credited Service	% of Normal Retirement Benefits
Less Than 5	0%
5 or more	100%

Benefit: The participant's accrued Normal Retirement Benefit as of the date of termination. Benefit begins on the member's Normal Retirement date. Alternatively, police officers and firefighters may elect to receive an actuarially reduced Early Retirement Benefit any time after age 50.

Normal Form of Benefit: For Non-Hazardous Duty (Non-Grandfathered)

A monthly annuity is paid for the life of the participant.

For Hazardous Duty Police Officers and Firefighters (and Grandfathered Non-Hazardous Duty)

A monthly annuity is paid for the life of the participant. After the participant's death, 100% of the Normal Retirement Benefit shall be paid as a survivor annuity to the spouse for 5 years. After 5 years, such survivor annuity is reduced to 50% of the original amount. The survivor annuity ceases upon death or remarriage of the spouse. 120 monthly payments are guaranteed for police officers and firefighters. Optional forms of benefits are available.

COLA: 1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

Hazardous Duty participants with less than 10 years of Credited Service and Nonhazardous Duty participants with less than 5 years of Credited Service will receive a refund of their own accumulated contributions with interest.

T. Refunds

Eligibility: All Hazardous Duty members terminating employment with less than 10 years of Credited Service and Nonhazardous Duty members terminating employment with less than 5 years of Credited Service are eligible. Optionally, vested members may elect a refund in lieu of the vested benefits otherwise due.

Benefit: Refund of the member's contributions with 5% simple interest paid in a single lump sum.

U. Member Contributions

8% of Compensation for Non-Hazardous Duty participants.
10% of Compensation for Hazardous Duty participants (8% of Compensation if grandfathered).

V. Employer Contributions

Each plan year, the Employer must contribute a minimum of 7% of the Compensation of all employees participating in the plan, plus any additional amount determined by the actuary needed to fund the plan properly according to State laws.

W. Cost of Living Increases

1.5% annually commencing on each April 1 for all retirees and beneficiaries who have received at least 6 monthly benefit payments. For non-grandfathered members (not eligible for normal retirement on January 1, 2013), there is a five-year delay (after the retirement date) until this COLA is applied to benefits accrued after January 1, 2013. For Police Officers and Firefighters, the COLA with a 5-year delay (applicable to post-January 1, 2013 benefit accruals) only applies to Police Officers and Firefighters employed by the City on or after January 1, 2020 and October 1, 2022, respectively.

X. 13th Check

Not Applicable

Y. Deferred Retirement Option Plan

Not Applicable

Z. Other Ancillary Benefits

There are no ancillary retirement type benefits not required by statutes but which might be deemed a City of Clearwater Employees' Pension Plan liability if continued beyond the availability of funding by the current funding source.

AA. Changes from Previous Valuation

None.
