Re: Sole Source Statement

To Whom It May Concern,

Linko Software is a software brand that is owned and operated by Aquatic Informatics Inc. ("AQI").

AQI is the developer and producer of the Linko suite of software products for the data management of managed industrial, pretreatment, & FOG compliance programs.

AQI is one of a group of companies (including among others, OTT Hydromet and Hach) that are 100% owned subsidiaries of Veralto Corporation, a publicly traded company on the NYSE.

AQI is the sole developer and producer of this proprietary software. AQI, in addition to selected subsidiaries of Veralto, are the only organizations authorized to provide Linko Software, implementation services, training or support of Linko Software.

Except for subsidiaries owned by Veralto, there are no outside sales agents or representatives authorized to sell Linko Software or services. Any sales agent or representatives authorized to sell Linko Software and services are direct employees of AQI, or a Veralto subsidiary.

Please contact us with any questions or concerns.

Thank you,

Aquatic Informatics Customer Success Team
