Jake McLean
Regional Sales Manager

Dear Justin Fletcher

Thank you for your interest in CUES products and for allowing us the opportunity to provide this proposal. We understand the task of choosing a vendor can be daunting, and we respect how difficult it is to weigh the differences between manufacturers and system designs.

Since 1964, CUES has been the pipe inspection industry leader, offering the most reliable and durable equipment in the world, while bringing the best available technologies to the market.

Based on our discussion of your business needs I have listed what you indicated was important to you in choosing a CCTV equipment provider:

- We are always attempting to reduce downtime due to parts and shortages.
- Downtime costs us money, so we need reliable equipment
- Parts availability/repairs

Based on your needs above we have listed below how CUES will help provide solutions for these:

- CUES Customer Support Centers and field service technicians are located throughout North America. Each center stocks parts and loaners, as well as servicing your equipment.

We offer world-class technical support to your team, with the most collective industry knowledge of any manufacturer. CUES is the only industry company to offer a 100% full-circle solution for all your pipeline inspection needs.

We take pride in providing long-term pipeline and manhole inspection solutions. Thank you again for the opportunity to provide this proposed solution.

Sincerely,

Steven Jayko
