Public Art for Capital Improvement Projects

Project: Gas Systems – Pinellas Building

Budget: 200,000

Project Manager (s): Tara Kivett, Brian Langille, Chuck Warrington

Department Contact: Brian Langille, Chuck Warrington

Department: Gas

Other Staff: Janet Dorrough

Where is the Project in its development?

Currently in Phase 1. Expected completion: Oct 2020. Phase 2 Starting in Sept 2019

Where would the Public have access to the building/site?

Main office area and walking along side the buildings along the Pinellas trail

What ideas for Public Art have been discussed or talked about?

-Murals facing the Pinellas Trail along the buildings that are a part of Phase 2, consisting of 3 panels

-Something that compliments the color and architecture of the buildings and in line with the design district guidelines (Old Bay).

-Murals could be a way finding piece, or serve as an entry way to downtown, gateway to the district, etc.

Other:

-Entry way fountain piece: Can this count toward the Public Art budget?

If you want this to go toward the Public Art project it will have to follow the Public Art process steps and get approval.

-If there is any extra money left over can it go toward the discretionary fund?
