

## Gas Main Replacement Project

### ATTENTION: ALL RESIDENTS AND BUSINESS OWNERS

Clearwater Gas System (CGS) technicians and representatives will be working on our natural gas system in your neighborhood.

The work is a requirement in support of our gas main and service line replacement program. If you have natural gas service, CGS will need safe access to your property and your natural gas meter.

We will also need to enter your home or business to perform an appliance and piping safety check of your customer maintained gas system. We will contact you to schedule a day and time to perform the safety check. These tasks are a requirement and ensure continued safety and reliability of the natural gas system in your area.

The main replacement project will involve our contractor, **CONTRACTOR NAME-** are contracted to replace our underground antiquated mains and service lines (in your neighborhood). Please note that all landscaping and paving will be restored, if disturbed by CGS or our contractors.

(over)

**DRAFT**  
Side 1 & 2

All personnel will be easy identifiable based upon their uniforms and/or safety vests/company vehicles.

We apologize for any inconvenience and appreciate your patience during this gas main improvement project. Please feel free to contact us if you have any questions/concerns:
