RE: Salsnes Filter™ Replacement Parts

In the Engineered Submittal Package for the Salsnes Filter SF6000, Trojan Technologies provided an equipment performance guarantee stating that the system will meet the required total suspended solids (TSS) and/or biological oxygen demand (BOD) removal provided that the system is operated and maintained in accordance with recommendations made by Trojan Technologies.

In order for this equipment guarantee to be maintained, it is imperative that the appropriate components and replacement parts be used in the system. There are key replacement parts and system components that directly influence the performance and reliability of the system. Among these critical replacement parts are the filter mesh, air knife, bearings, screens, dewatering screw (if provided), etc. Without using a filter mesh, dewatering screw, and other components that are approved and validated by Trojan Technologies, we cannot guarantee that the system will provide the required solids removal. Subsequently, we cannot guarantee that any downstream treatment systems will continue to operate as expected if the components operating the Salsnes Filter system are unknown.

In order to keep the equipment performance guarantee intact, it is recommended that specialized system components be purchased and contracted from Trojan Technologies. Trojan provides only validated system components (filter mesh, bearings etc.) which meet our performance standards to our customers.

If you have any questions regarding this matter, or require any additional information please do not hesitate to contact me.

Best regards,
TROJAN TECHNOLOGIES
