Micheal,

We are currently out of the land application business as the State is getting ready to pass legislation that will make it nearly impossible to perform the application and the public scrutiny against the practice makes it too great of a liability to expose ourselves and our clients to at this time. I am hopeful that the State of Florida changes their mind on the new legislation but word is that they won't. I will keep you apprised of that situation as it develops.

Sincerely,

Tom Otermat, CCOM

Subject: Biosolids Land Application Sites

Good Morning Tom,

In the attached it states that T Wayne Hill is no longer able to apply biosolids to the permitted sites that it manages for the remainder of CY 2020. Do you plan on resuming biosolids in January? Additionally, could you provide the current status of each of the land application sites on our Ag. Use plan?

Please share any questions or concerns.

Thanks,
Mike

Jason,

We have not acquired anymore property and at this time and have no more space. I have attached the original letter that shows our fields are full. We will be watching the outcome of the land app rules that are slated for discussion on the 18th of this month. It looks like they are still on track to eliminate Class B. I will keep you posted.

Thanks,

Tom Otermat

Good afternoon,

I hope all is well.

I am checking in with you and will do this monthly moving forward to see if you have access to any new land applications sites or your current ones have capacity?

If you have available capacity at any time on your land application fields we are to send our biosolids there first per our contract.

Also, with the monthly emails please send us a certified report from you engineer on the status of your current land applications sites capacities.

If you have any questions feel free to contact me at your earliest convenience.
