**SUBJECT/RECOMMENDATION:**

Approve an Engineer of Record (EOR) Work Order to Atkins North America, in the amount of \$115,007 for the study of water circulation around Cooper's Point (18-0009-EN) and authorize the appropriate officials to execute same. (consent).

**SUMMARY:**

Cooper's Point Master Plan identified several projects that would provide ecological and recreational opportunities. This circulation study will build upon that initial plan. By evaluating several alternatives for each project, the best overall project with the most ecological benefit will be determined. Alternatives to be evaluated include channel dimensions, inlet openings, and culvert locations.

The circulation study results will be used for future project design, permitting and assist in applications for cooperative funding and grants.

The project will be completed within six months from approval.

**APPROPRIATION CODE AND AMOUNT:**

ENST180005-STDY-PROSVC

Funds are available in capital improvement project ENST180005, Coastal Basins, to fund this work order.
