### SUBJECT/RECOMMENDATION:

Review an update on the Clearwater Police Department District III Substation project.

### SUMMARY:

The Clearwater Police Department District III Substation project is proceeding. An exterior wall along the west façade of the main building has been identified as a public art site. This wall encloses the building's equipment yard and faces the public parking area. The wall is located adjacent to the building's public entrance and is one of the first sights seen upon entering the facility. The wall measures 49' 5" long and 20' 10" high. A sliding gate measuring 12' long and 9' 4" high is mounted behind the wall and allows access to a restricted area housing the equipment yard. The wall area available for public artwork, less the gate, is approximately 918 square feet.
