Legislation Text

File #: ID#20-8535, **Version:** 1

SUBJECT/RECOMMENDATION:

Imagine Clearwater Construction Update

SUMMARY:

As infrastructure work on the Coachman Park redevelopment gets underway, City Council review of the most recent iteration of the redesigned park will occur. Staff will prepare a “errata” list or breakdown of current or future design options. These options, determined after staff review of various cost components, can be added later should additional resources be identified or become available, or as components of future capital expenditures by the City or alternatively, a park conservancy or “Friends of the Park” type of supporting park organization(s). In addition, it is anticipated that a final discussion and determination can be made on future library improvements. Lastly, the RFP for the bluff properties should be available for review and discussion of the extent and timing of the marketing effort.
